Data Analyst Portfolio

Data Insight to Business Impact

Hello,

My Name is Fasya Nur Afifah. I am a Physics Graduate transitioning to Data Analytics, with strong analytical thinking and a passion for turning data into actionable insights.

Education & Background

Indonesia University of Education

Bachelor of Physics *2021 - 2025*

GPA 3.54/4.00

Relevant Course: Statistics, Data Engineer at Dibimbing.id from Independent Study MSIB Program

Dibimbing.id

Data Analytics & Business Intelligence Bootcamp *June 2026 - Present*

Analytical Skills: Data Cleaning & Manipulation, Data Visualization, Data Statistic

Tools: Python, SQL, Power BI, Tableau

Professional Experience & Achievements

i3L University, Jakarta

Des 2025 - Jun 2026

Research and Community Service Intern

- Managed and validated 1.000+ institutional research databases to improve data integrity and ensure data consistency.
- Developed analytical reports and research recapitulations based on publications, citations, funding, and research clusters.

International Journal of Thermofluids

2026

Publication

Hasanah, L., **Afifah, F. N.**, Pawinanto, R. E., Iqbal, M., Gumilar, G., Yusuf, M., Indrasari, W., Hamidah, I., Yunas, J., & Mulyanti, B. (2026). A stable high mixing performance of Koch fractal array obstacle-based micromixer. *International Journal of Thermofluids*, 32, 101550. https://doi.org/10.1016/j.ijft.2026.101550

Skill & Expertise

Programming Languages

1

- Python
- Postgresql

Visualizations

2

- Tableau
- Power BI

Soft Skills

3

- Professional Communication
- Strong Analytical Thinking
- Problem Solving

Previous *Project*

OBJECTIVES

The Company, particularly the sales and marketing teams, wishes to assess its overall performance in 2023 and 2024 so that they can draw up strategies and campaigns for the following year, namely 2025, with the aim of ensuring that revenue and profit in 2025 exceed those of 2023 and 2024.

Data Understanding

Products
Unique Product and its price

Customers
Unique customers ID

Territories
Sales by Region, Country, and Continent

Sales
Order ID, Recapulation of Orders including Total Sales and Profit

Returns
Uniquw Return with its Product and Quantity

Calendar
Timestamp from 2023 - 2024

Adventure Works Dataset

2026

Processing Data

01

Missing Value

Identified blank and null values, then removed and replaced them to keep the dataset accurate

02

Duplicated Data

Detected and removed duplicate value to prevent double counting and misleading results.

03

Change Data Type

Converted columns into the correct types (date, number, text)

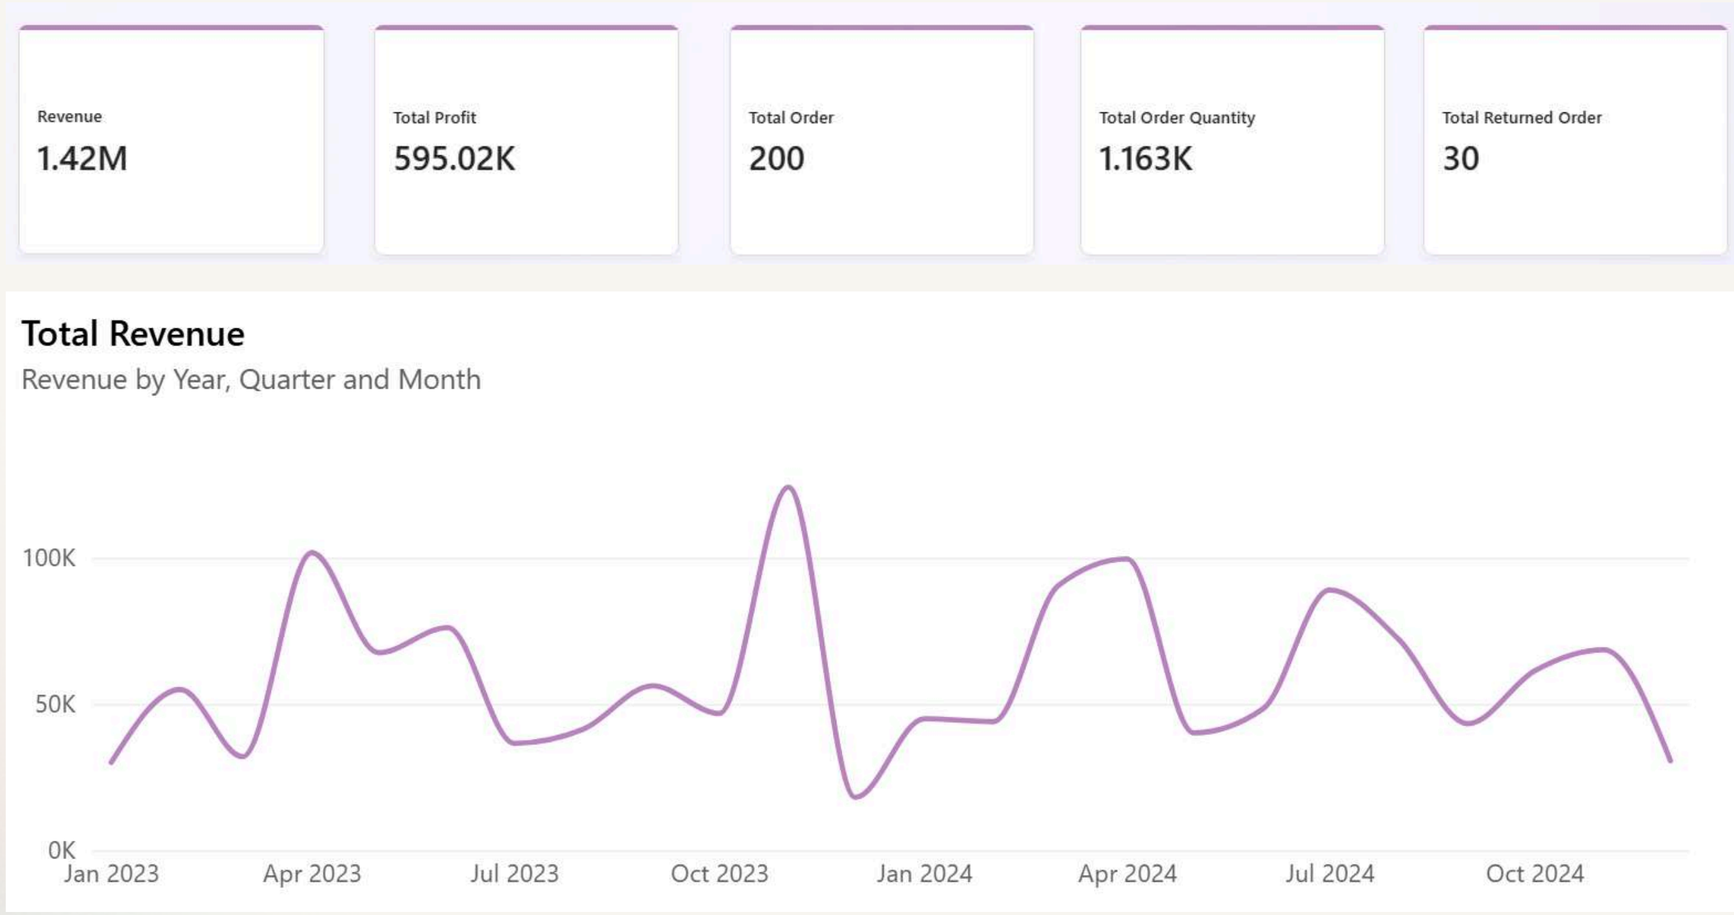

04

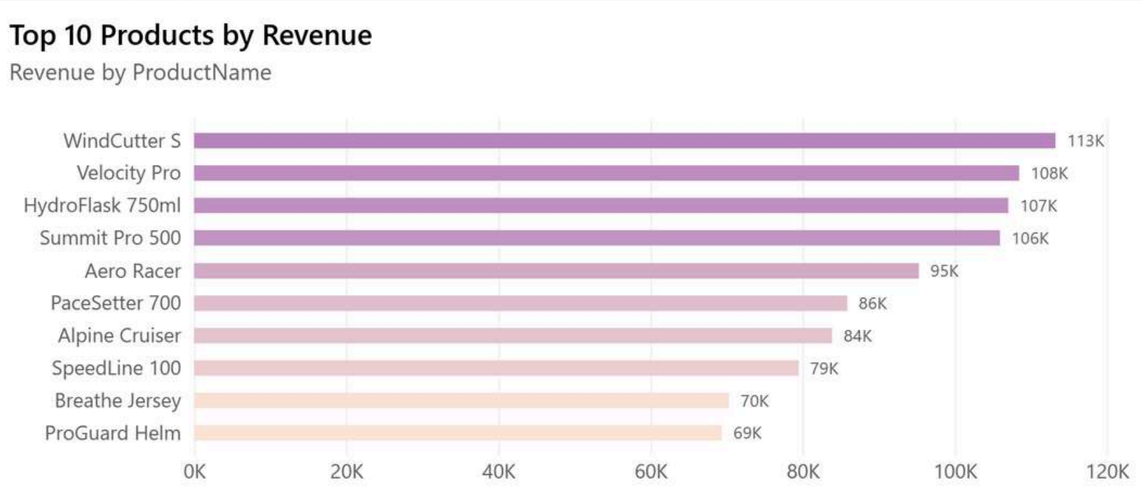

DAX Formula

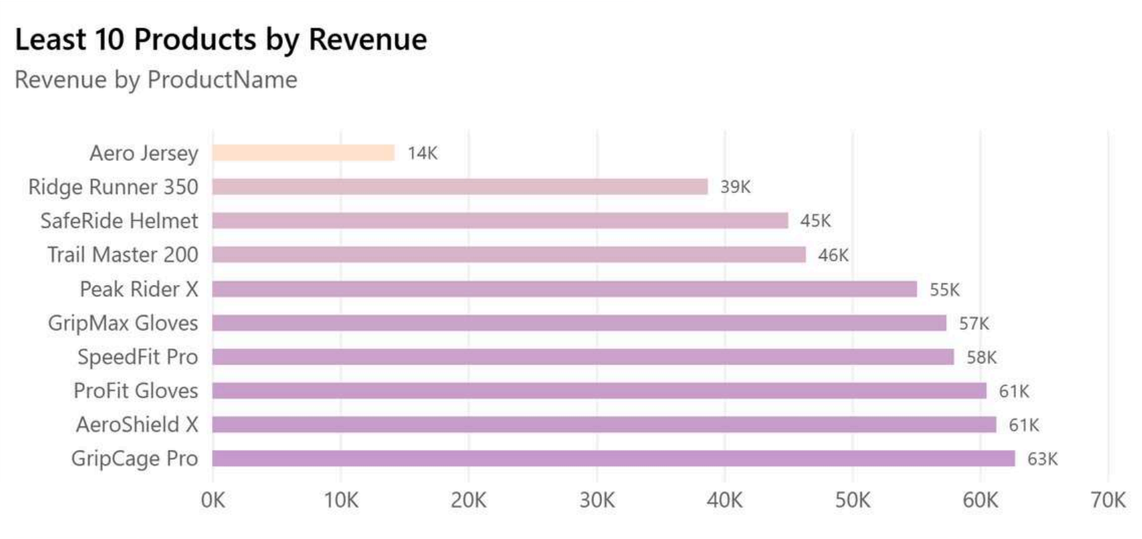

Created DAX Formula to calculate columns and measures

Overall Sale Performance *Analysis*

- Based on total revenue and total profit in 2023 and 2024, the profit margin is 42%.
- With returned orders accounting for 15% of the total number of orders, we need to reduce this figure to around ~5% by 2025.

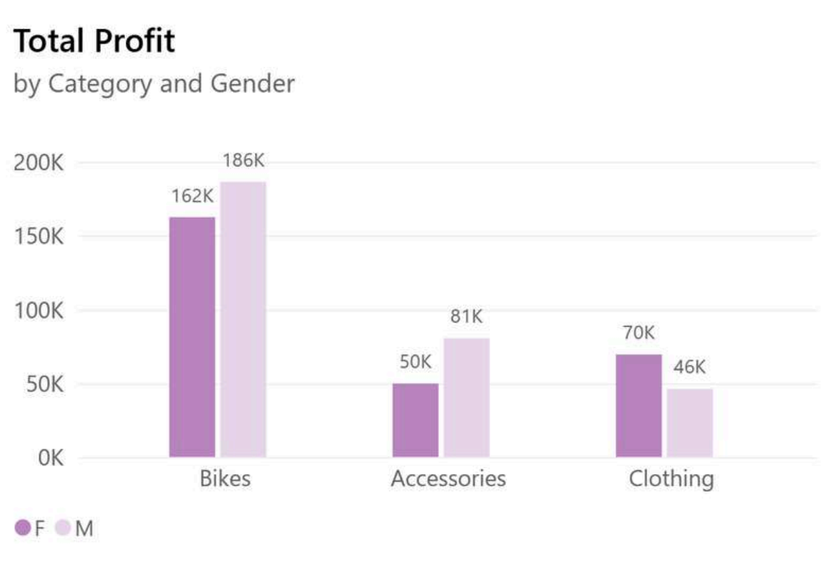

Product Analysis *by Revenue*

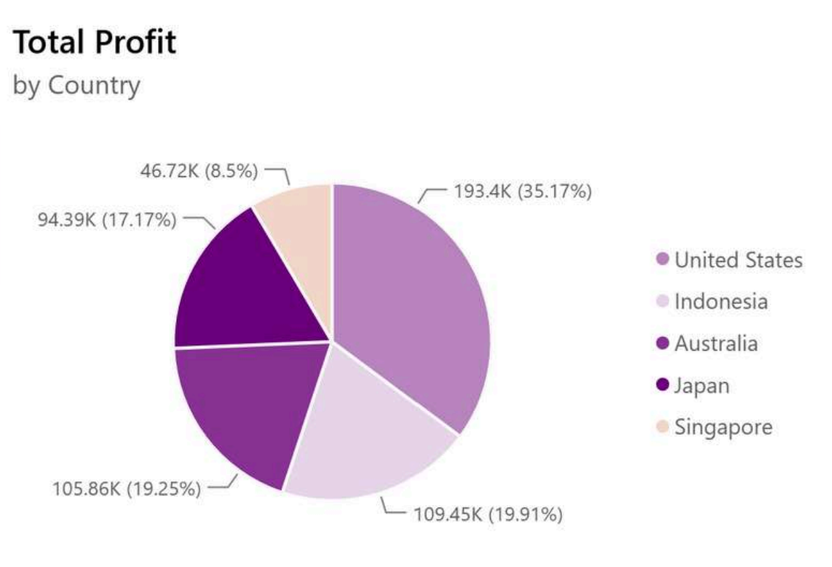

- The top-selling product is the Wind Cutter S from the Bikes category, and the least-selling product is the Aero Jersey from the Clothing category.

Recommended Action:

- Attention should be paid to stock levels and product availability for top-selling products.
- Based on the least popular top products and top products by category, these should be adjusted to meet users' future needs (taking into account gender-specific requirements or their specific needs).

Total Profit by *Category & Country*

- By category, two out of three categories are dominated by men.
- Women dominate the clothing category more than men do, and are less interested in accessories (a 29% gap).
- As bike sales are quite high for both genders, it is necessary to make accessories and clothing more appealing and better suited to users' needs in order to increase revenue (perhaps by offering product bundles).
- The United States leads in terms of profit, followed by Indonesia.

Thank You

see you soon
